

Ideation Phase
Empathize & Discover

Date	11 July 2026
Team ID	
Project Name	Electric Vehicle Performance & Market Analysis Dashboard
Maximum Marks	4 Marks

Empathy Map Canvas:

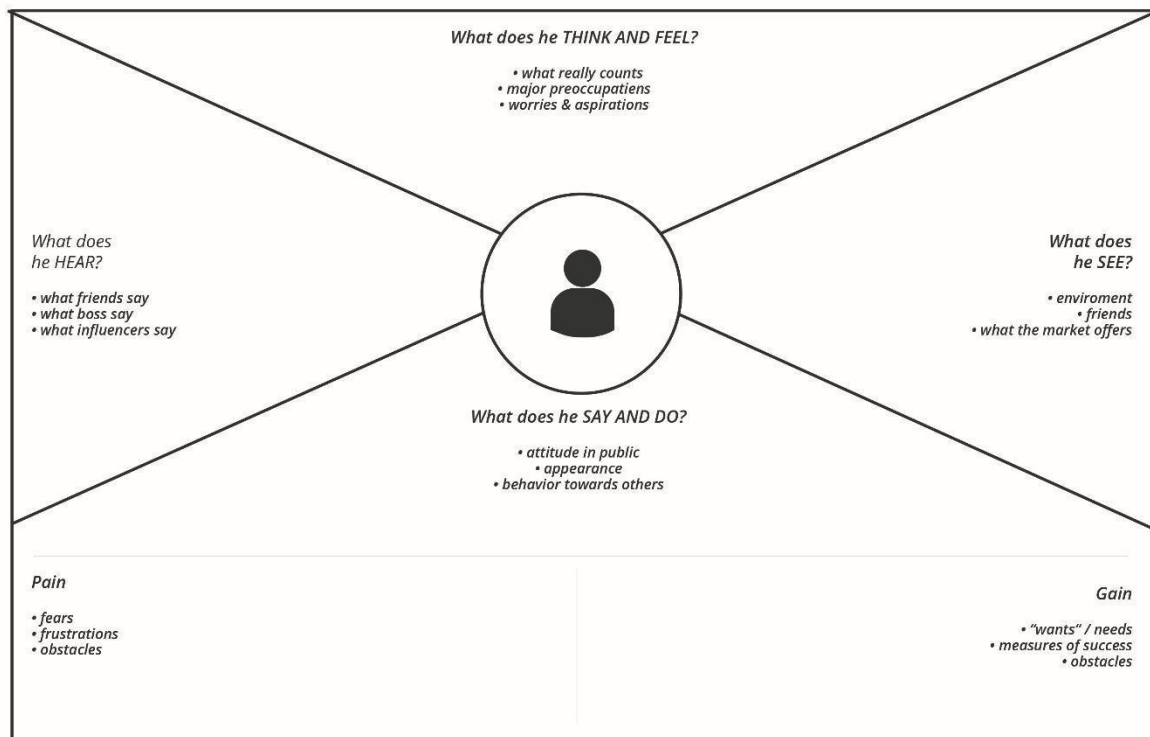

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example: Electric Vehicle Performance & Market Analysis

THINKS

- Wonders which EV brand offers the best balance of speed, range, and price.
- Thinks whether expensive EVs provide significantly better performance.
- Wants reliable information before purchasing an electric vehicle.
- Looks for an easy way to compare multiple EV models in one place.

SEES

- Many EV brands with different specifications and prices.
- Online reviews that often provide conflicting opinions.
- Charging stations distributed unevenly across different regions.

- Large amounts of raw data that are difficult to interpret.
-

SAYS

- "Which EV offers the best value for money?"
 - "I need an easy way to compare EV brands."
 - "Which vehicle has the highest top speed and driving range?"
 - "Where are charging stations available near my region?"
-

DOES

- Compares multiple EV models before making a decision.
 - Checks vehicle range, acceleration, top speed, and charging speed.
 - Uses dashboards and charts instead of reading large datasets.
 - Filters information based on brand, body style, price, and region.
-

PAINS

- Raw EV datasets are difficult to understand.
 - Comparing hundreds of EV models manually is time-consuming.
 - Missing or inconsistent data reduces confidence in analysis.
 - Lack of interactive visualizations makes decision-making difficult.
-

GAINS

- Quickly compares EV models using interactive dashboards.
 - Identifies the fastest and longest-range vehicles.
 - Understands price differences across brands.
 - Gains meaningful insights from visual analytics.
 - Makes informed purchasing and business decisions.
-

User Needs

- Interactive dashboard for EV performance analysis.
- Easy comparison of top speed, acceleration, range, and pricing.

- Region-wise charging station analysis.
- Clean and accurate data for reliable insights.
- Simple filters for Brand, Body Style, Price, and Region.
