

Electric Vehicle Performance & Market Analysis Dashboard

Project Overview

Project Title	Electric Vehicle Performance & Market Analysis Dashboard
Repository	EV Analytics Dashboard
Platform	MySQL + Tableau Public
Developer	Koti Marpina (Individual Project)

This project analyzes electric vehicle datasets using MySQL and Tableau to compare EV brands, top speed, range, acceleration, charging speed, pricing and charging infrastructure.

Customer Persona

Primary User	EV Buyer / Data Analyst
Age	20-50 Years
Occupation	Business Analyst / Customer
Goal	Compare EV performance and pricing

Goals

- Compare EV models.
- Analyze speed, range and acceleration.
- Understand charging station distribution.
- Support data-driven decisions.

Challenges

- Raw data needs cleaning.
- Large datasets are difficult to compare manually.
- Need interactive dashboards for insights.

Customer Journey

Stage	Activity
Access	Open dashboard
Explore	Review KPIs
Compare	Filter brands/models
Analyze	Identify insights
Decide	Select suitable EV
